Accessibility

We have tried to ensure the the Camberley Rubber Mouldings Ltd website is accessible to all audiences, including those with visual impairments or other disabilities. We have worked hard to get the website to comply with all priority 1 rules set out by the W3C Web Content Accessibility Guidelines.

We believe that the website does comply to all priority 1 rules. This is somewhat of a judgement call, because many guidelines set out by the W3C are intentionally vague. If you have any questions or comments please contact us at the following email address: accessibility@camberleyrubber.com.

Standards Compliance

The pages of this site validate as XHTML 1.0 Transitional . You can see the Mark Up Validation Report for any page by entering the URL for that page into the W3C Validator. For example, the mark up validation report for the home page.
All pages on this site make use of Cascading Style Sheets (CSS), written in well formed code. Content remains readable without the use of Style Sheets.

Links & Images

Links have been written to make sense out of context.
All images include an 'ALT' attribute. All images are optimised to reduce file size without compromising quality. This is to facilitate fast download times for all users, regardless of the speed of their internet connection.

Browser Support

The website has been tested in all major browsers.

Further Assistance

If you require further assistance accessing any of the content on this website, or would like to contact us for any reason, you can email us at accessibility@camberleyrubber.com.
